5. Children should be supervised to ensure that they do not play with the appliance.

6. Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.

7. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Bring it to a qualified technician for examination, repair or electrical or mechanical adjustment.

8. The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.

9. Do not use outdoors.
10. Do not let cord hang over edge of table or counter, or touch hot surfaces.

11. Do not place on or near a hot gas or electric burner, or in a heated oven.

12. Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.

13. Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to “off”, then remove plug from wall outlet.

14. Do not use appliance for other than intended use.

15. Make sure the crisping tray is in place before adding food to be air fried.

**FOR HOUSEHOLD USE ONLY**
ADDITIONAL IMPORTANT SAFEGUARDS

CAUTION HOT SURFACES: This appliance generates heat and escaping steam during use. Proper precautions must be taken to prevent the risk of burns, fires, or other injury to persons or damage to property.

CAUTION: This appliance is hot during operation and retains heat for some time after turning OFF. Always use oven mitts when handling hot materials and allow metal parts to cool before cleaning. Do not place anything on top of the appliance while it is operating or while it is hot.

1. All users of this appliance must read and understand this instruction manual before operating or cleaning this appliance.

2. The cord to this appliance should be plugged into a 120V AC electrical outlet only.

3. If this appliance begins to malfunction during use, pull the frying basket drawer out of the body. Then remove plug from wall outlet. Do not use or attempt to repair the malfunctioning appliance.

4. Do not leave this appliance unattended during use.

5. Do not immerse power cord in any liquid. If the power cord to this appliance is damaged, it must be replaced by contacting Consumer Service.

6. Keep the cord out of reach from children and infants to avoid the risk of electric shock and choking.
7. Place the Air Fryer on a flat, heat-resistant work area.

8. Do not obstruct the air outlet or air inlets on the back and sides of the Air Fryer, with any objects. Avoid escaping steam from the air outlet during air frying.

9. Keep appliance at least 4 inches away from walls or other objects during operation.

10. Always use the frying basket handle to open frying basket drawer.

11. **WARNING:** After air frying, make sure to place the frying basket drawer on a flat, heat-resistant surface.
**WARNING:** Over-filling the frying basket may damage the Air Fryer and could result in serious personal injury.

12. Never move a hot Air Fryer or an Air Fryer containing hot food. Allow to cool before moving.

13. Do not clean with metal scouring pads. Pieces can break off the pad and touch electrical parts, creating a risk of electric shock.

**NOTES ON THE PLUG**

This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug will fit in a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not modify the plug in any way.
NOTES ON THE CORD

A. A short power-supply cord (or detachable power-supply cord) is to be provided to reduce the risk resulting from becoming entangled in or tripping over a longer cord.

B. Longer detachable power-supply cords or extension cords are available and may be used if care is exercised in their use.

C. If a long detachable power-supply cord or extension cord is used:
   1. The marked electrical rating of the cord or extension cord should be at least as great as the electrical rating of the appliance;
   2. If the appliance is of the grounded type, the extension cord should be a grounding-type 3-wire cord.
   3. The longer cord should be arranged so that it does not drape over the countertop or table top where it can be pulled on by children or tripped over unintentionally.

PLASTICIZER WARNING

CAUTION: To prevent Plasticizers from migrating to the finish of the counter top or table top or other furniture, place NON-PLASTIC coasters or place mats between the appliance and the finish of the counter top or table top. Failure to do so may cause the finish to darken; permanent blemishes may occur or stains can appear.

ELECTRIC POWER

If the electrical circuit is overloaded with other appliances, your appliance may not operate properly. It should be operated on a separate electrical circuit from other appliances.

WARNING! ALWAYS USE A MEAT THERMOMETER TO ENSURE THAT MEAT AND FISH ARE COOKED THOROUGHLY BEFORE EATING.

Air Frying Technique

1. Please consult the Air Frying Chart and/or follow package instructions for suggested TIME and TEMPERATURE.

2. To assure even cooking/browning, ALWAYS open the frying basket halfway through the cooking time and check, turn or shake foods in the frying basket. Adjust TIME or TEMPERATURE if needed.

WARNING: Extreme caution must be used when handling the hot frying basket and crisping tray. Avoid escaping steam from the frying basket and the food.

CAUTION: Always use oven mitts when handling the hot air fryer basket.

CAUTION: Hot oil can collect at the base of the drawer. To avoid risk of burns or personal injury, or to avoid oil from contaminating air fried foods, always unlock and remove the frying basket from the drawer before emptying. NEVER turn the drawer upside down with the frying basket attached.

3. If additional air frying is needed, adjust TEMPERATURE if desired, and set TIME for 2 to 5 minute intervals until fully cooked.

4. When the air frying TIME expires, the white convection fan will continue to blink for 15 seconds then stops. In the display END will appear for 15 seconds, 3 beeps will sound. The POWER/START turns red.

The white convection fan will continue to blink for 15 seconds then stops. In the display END will appear for 15 seconds, 3 beeps will sound. The POWER/START turns red.

**WARNING! ALWAYS USE A MEAT THERMOMETER TO ENSURE THAT MEAT, POULTRY AND FISH ARE COOKED THOROUGHLY BEFORE EATING.**

6. If recipe instructions instruct, allow cooked foods to rest for 5 to 10 minutes. Remove the frying basket from the machine and place on a flat, heat resistant surface.

7. Use tongs or a long fork to remove air fried foods onto a serving plate. Promptly replace the frying basket into the front of the air Fryer. Continue with subsequent batches, if any.

8. Unplug the Air fryer when not in use.

**Turn Food Function ( AIR FRY, ROAST, BROIL & BAKE)**

Half way through cooking, the display changes to trn and beeps for 5 seconds to remind you to flip or shake your food items. Remove the air fryer basket to pause the program. Turn or shake food as desired, then insert the air fryer basket back into the cooking chamber. Once fully inserted, cooking will resume automatically.

A Note on Air Frying Pre-Packaged Frozen Foods

1. The air fryer is powered with 1700W high performance technology that circulates heat for fast air fry and recovery.

2. As a general rule, reduce the package cooking time by 30% to 50% depending on the food and amount to be cooked.

3. Always check food halfway though cooking time to determine final cook time and temperature.

4. Always check cooking progress after TIME has expired. If more time is needed, cook at short time intervals until food tests done.
For Best Results

1. Use your air fryer to cook pre-packaged foods with a fraction of the oil, in a fraction of the time!

2. Always check food halfway though cooking time to determine final cook time and temperature.

3. Always pat food dry before cooking to encourage browning and avoid excess smoke.

4. To avoid excess smoke, when cooking naturally high fat foods, such as chicken wings or sausages, it may be necessary to empty fat from the frying basket drawer between batches.

5. For crispier results, air fry small batches of freshly breaded foods. Create more surface area by cutting food into smaller pieces. Press breading onto food to help it adhere. Refrigerate breaded foods for at least 30 minutes before frying.

6. Arrange breaded food in frying basket so that food is not touching to allow air flow on all surfaces.

7. Spray olive oil or vegetable oil work best as oil is distributed evenly and less oil is needed.

8. Do not overfill frying basket with food. NEVER fill any frying basket more than 2/3 full. When air frying fresh vegetables, we do not recommend adding more than 3 cups of food to the frying basket.

9. Some foods need to be shaken vigorously or turned over during the air fry time. Consult the Air Frying Chart for a general guide.
Air Frying Chart *(Includes Preset Menu Items)*

WARNING! ALWAYS USE A MEAT THERMOMETER TO ENSURE THAT MEAT, POULTRY AND FISH ARE COOKED THOROUGHLY BEFORE EATING.

IMPORTANT! For your convenience, your air fryer has 8 built in smart cooking options: Air Fry, Roast, Broil, Bake, Reheat, Keep Warm, Pizza and Dehydrate.

The following chart is intended as a general guide only. The quantity of food air fried at one time, the thickness or density of the food, and whether the food is fresh, thawed, or frozen will alter the total cooking time necessary.

1. To assure even cooking/browning, open the frying basket drawer halfway through the cooking time. Check, turn or vigorously shake foods in the frying basket. This chart lists cooking temperature, average total air frying time, and what action is to be taken for best results.

2. Frying smaller batches will result in shorter cooking times and higher food quality. Adjust air frying temperatures and times as necessary to suit your taste.

**IMPORTANT NOTE:** Unless food is pre-packaged and pre-oiled, for browned and crispy results, all foods should be lightly oiled before air frying.

**PLEASE NOTE:** The USDA recommends that meats such as beef and lamb, etc. should be cooked to an internal temperature of 145°F/63°C. Pork should be cooked to an internal temperature of 160 °F/71 °C and poultry products should be cooked to an internal temperature of 170 °F/77 °C - 180 °F/82 °C to be sure any harmful bacteria has been killed. When reheating meat/poultry products, they should also be cooked to an internal temperature of 165°F/74°C.
